

The feedback loop and consultation process.

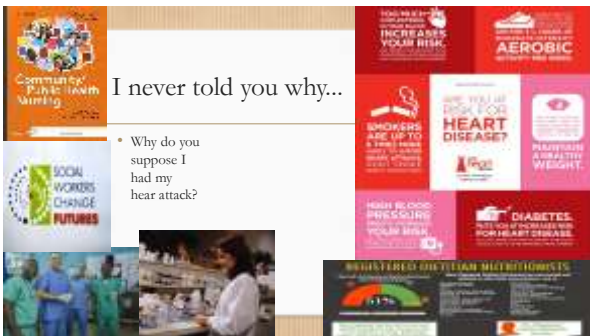

- I want to feel confident, I am being cared for, monitored and that my situation is unique and dynamic. It takes, sometimes, 5-10 days before I can get into see my family doctor... a lot can go wrong during that time, if I am having a scare of some sort.
- What approach do you take when consulting with a cardiac patient with circumstance similar to me? **TURN AND TALK.**
- Why do I ask this?

If not you..... then who?

I never told you why...

- Why do you suppose I had my hear attack?

Look after yourself and others.... Our lives depend on it.

Video-Questions.

Sincerely, thank you
